

Skills Bootcamps are free, flexible courses of up to 16 weeks, giving anyone* the opportunity to build up sector-specific skills and fast-track to an interview with an employer.

SKILLS BOOTCAMP IN DATA ANALYTICS

ABOUT

The Skills Bootcamp in Data Analytics provides you with a complete understanding of data processing life cycles.

You will have the opportunity to gain an internationally recognised CompTIA qualification. This validates your ability to facilitate data-driven business decisions including mining data, manipulating data, visualising and reporting data, applying basic statistical methods and analysing complex datasets. You will also develop an understanding of the governance and quality standards that apply throughout the entire data lifecycle

The programme is the ideal kick starter for those with no prior tech knowledge to enter the workforce as a skilled data analyst and business intelligence analyst.

CONTENT

Data Concepts and environments | Data Mining | Data Analysis
Visualization | Data Governance, Quality & Controls |
Careers Guidance | Personal development and transferrable skills

CAREERS

With this qualification, you can explore careers in data analytics, clinical analytics, reporting analytics, marketing analytics, business data analytics, operations analytics, business intelligence analytics, cyber security analytics.

If you want to continue to learn, you might want to consider a level 4 apprenticeship, Certificate of Higher Education or possibly a degree programme, depending on your previous qualifications.
